WORLD CHAMPION SCALP OPTIC HAIR 2019

At the Eyebrow Festival in Rotterdam, Dr. Christian Strasser was crowned the first world champion for scalp pigmentation with the GAUBE Scalp Method. 130 participants competed in 12 categories for the coveted award.

We are pleased to have brought the world champion title for scalp thickening, bald pigmentation and hair follicle stimulation to Austria!

HAIR REVITALISATION

Hair is often an integral part of self-esteem and is seen as a sign of health and strength. The social significance of main hair as a symbol of vitality has a direct influence on our image of ourselves and others. Often the loss of hair is accompanied by a loss of self-worth: withdrawal and depression are the result.

The effects on social interaction and professional development are manifold and should not be underestimated!

The revolutionary stimulus treatment, based on the technique of derma- or microneedling, reactivates inactive follicles and revives the body's own production of hair!

53	GAUBE® SUPERBOOSTER HYA CAPS

Micro- or Dermaneedling, formerly also called Meso - SOFT LIFT LINING®, comes from the anti-aging field and refers to a treatment in which hyaluronic acid is worked into the skin using a permanent make-up device and its own modules. Important active ingredients are introduced into the deeper layers of the skin, where superficial creams cannot reach. This gives the skin intensive moisture and more elasticity, which in turn improves the overall appearance of the skin.

THE BEAUTY TURBO BOOSTER

This treatment replenishes the natural hyaluron depots and stimulates collagen production. Further anti-oxidant vitamin complexes of vitamin A, vitamin C and ceramides counteract premature skin ageing. This acts like a beauty turbo booster and the skin's own protection against damage, such as that caused by nicotine, UV radiation or stress, is strengthened.

NOTE:

Glycolic acid should not be used in summer and late spring as pigment shifts may occur.

An interval of up to 10 days between treatment sequences is ideal. After 6 applications, a break of several months can be taken.

GAUBE® REPAIR WRINKLE SMOOTHER IN THE SKIN

A booth product for incorporation by means of apparative cosmetics. Repair is built on 4 different hyaluronic acid structures and additionally contains Argireline and Synake as well as Carnosine. Wrinkles and lines are smoothed immediately and expression lines are reduced.

THE DIFFERENT HYALORONE STRUCTURES:

The top fraction protects and nourishes the skin on the surface.
The second fraction unfolds its effect in the epidermis.
The third fraction reaches the cell formation layer and triggers various signalling peptides in its production.
Due to the combination of the other fractions, it penetrates the skin more easily and forms a long-term depot.
Argireline and Synake - reduce expression lines and relax muscles.
Carnosine - an erPCSlasic cell renewer, protects the skin and rejuvenates it in an ideal way.

GAUBE® HAIR STIMULUS

HAIR REVITALISATION

Hair Stimulus takes advantage of the latest hair research and combines it into a revolutionary product: Microneedling for the head.

As part of our treatment, the important active ingredients are introduced directly at the hair root, where shampoos and superficial hair growth products cannot reach.

This targeted stimulation of the hair roots and follicles improves nutrient transport in the scalp and has been shown to increase the production of essential hair growth factors.

The treatment can be used on young and older people and achieves excellent results, especially in the long term.

- ✓ Relaxation of the scalp
- ✓ Increases microcirculation
- ✓ Increases the production of essential hair growth factors
- ✓ Activation of hair growth
- ✓ Increased well-being
- ✓ Healthier scalp
- ✓ Improved hair structure

Hair Stimulus works directly in the hair follicle - where conventional hair growth shampoos cannot reach.

VEGAN SUPERBOOSTER FOR SKIN, HAIR, NAILS & IMMUNE SYSTEM

Purely herbal food supplement made from natural ingredients and high-quality ingredients. Protects cells from stress - keeps skin, hair and nails healthy. Hya Capsules supplement a balanced diet with a plus of vital substances. They contain the best of goji berries, a vitamin B complex from buckwheat germ powder and natural vitamin C from the acerola cherry.

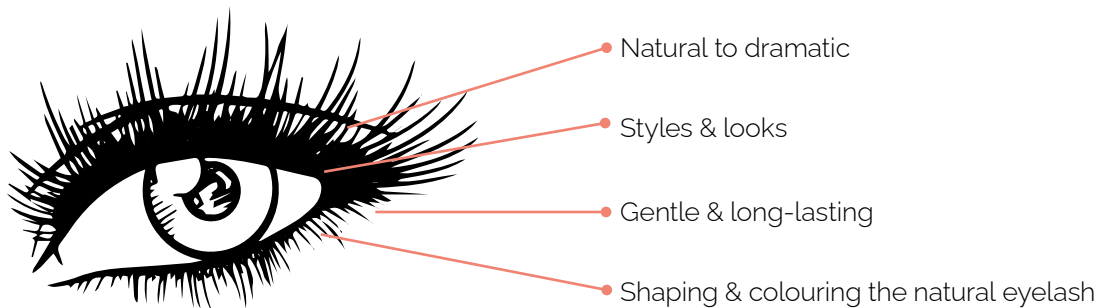

High-quality ingredients, carefully tested and effectively composed. Vitamin B2 (equivalent to the vitamin B2 content of 500g beef) and biotin contribute to the maintenance of normal skin. Folate and vitamin B12 have a function in cell division. Vitamin C and vitamin B2 help protect cells from oxidative stress. Zinc contributes to the maintenance of normal skin, hair and nails. In addition, it helps to reduce the susceptibility of herpes. Furthermore, it contains the coenzyme Q10. This is an endogenous substance that makes an important contribution to the functioning of the body's cells. It fends off free radicals inside and also outside the cells - these are the substances that, among other things, damage the cells and accelerate skin ageing. It can also provide protection against skin damage caused by UV radiation. The older we get, the lower the Q10 content in our skin becomes, which is why an additional intake can be beneficial.
